

Uganda

29 April – 9 May

Rob Gordijn & Helen Rijkse (gordijnrob@gmail.com) - www.penguinbirding.com

Introduction

This was a special trip and not initially planned. But Arjan Dwarshuis (<http://arjandwarshuis.com/>) planned on breaking the Big Year record, and needed a few companions during his Uganda leg to keep the costs down. This meant a shortened trip compared to usual trip and not the best time of year, but when he asked we did not hesitate. We were also joined by Wouter van Pelt and Sjaak Schilperoort. A mad trip in 9 days, as part of a mad year-long quest. Some photo can be found at: <https://goo.gl/photos/n4a6yeupjxUj4Y3g8>

Itinerary

Day 1	April 29	Arrival at Entebbe
Day 2	April 30	Mabamba Wetland, drive to Budongo
Day 3	May 01	Budongo Forest
Day 4	May 02	Murchison Falls NP
Day 5	May 03	Start at Murchison, drive to Kibale National Park
Day 6	May 04	Kibale National Park
Day 7	May 05	Via Queen Elizabeth NP to Buhoma - Bwindi Impenetrable NP
Day 8	May 06	Bwindi Impenetrable NP - Buhoma
Day 9	May 07	Bwindi Impenetrable NP – Buhoma via the Neck to Ruhija
Day 10	May 08	Bwindi Impenetrable NP - Ruhija
Day 11	May 09	Drive back to Entebbe

We were on a tight schedule for Arjan since maximizing the number of new species per day means that you don't stay long in one place. We missed the Green-breasted Pitta and the Grauer's Broadbill (for both species April is not the best moment of the year) but apart from did we see many targets and did very well given our short visit to each site. On our own we would probably have taken at least 2 weeks for this trip in which we would have spent more time at Queen Elizabeth NP (at least one full day) and also include some birding at Lake Mburo (Brown-chested Lapwing, African Finfoot). July seems to be the best time of the year with the biggest chance to see the Broadbill and the Pitta.

Practicalities

Travelling & accommodation

The entire trip was arranged through Gorillas and Wildlife Safaris (www.gorillasandwildlifesafaris.com) who took care of the transportation, accommodation and guiding. Our driver Ibrahim was a good guy who had experience with bird groups. He was enthusiastic about birds and knew some sounds but unfortunately he did not have any stake-outs

which probably costed us some extra species. The van he drove was old and on day one the radiator started leaking which slowed us down the rest of the trip until he fixed it at Buhoma by putting tea (!) in it. Luckily it did not break down entirely.

At most places we slept in tents or a simple room (Arjan and Wouter had negotiated up front to make the trip as cheap as possible). Still it was very comfortable with good meals included.

Guiding

Use of guides is necessary at most places. We used the following guides at each site. Especially Raymond at Budongo was exceptionally good and thanks to him we managed to see an amazing list of targets in just one single day.

- Mabamba – Ismael
- Budongo – Raymond
- Murchison – Did most birding on our own here, only for the boat trip to the falls Jerry joined us.
- Kibale – Gerrard Sr. (Forest for Pitta) & Gerrard Jr. (trail in Bigodi wamp)
- Buhoma - Matthew
- Ruhija - Amos

Literature

We used the field guide Birds of East Africa, and since the plates are not always great we also made a photo selection of the around 600 species we could expect in Uganda. Because the logistics were all taken care off we mainly focused on the birds and made target lists per site based on several trip reports from www.cloudbirders.com

Weather

Spring is known for high chances of rain. We did have rain on several days but luckily it had limited impact on our birding. The first day we had much rain but all while driving from Mabamba to Budongo. The full day at Budongo it started raining at 4pm and did not stop until late shortening our roadside birding. Again on our long driving day towards Kibale it rained with intervals and on all days at Buhoma and Ruhija we had some light or heavier rain in the afternoon.

Health and safety

Malaria occurs in Uganda so we took Malarone. During the trip most of the group had diarrhea for several days but luckily we came through unharmed. We felt very safe everywhere.

Money

ATMs were widely available in small towns.

Costs

We paid €1650 p.p. for the tour and €770 p.p. for our flight (KLM flies directly from Amsterdam to Entebbe with only a short stop at Rwanda on the trip to Entebbe). A few more euros were spent on beers, tips and groceries.

Visited Sites

We took a few GPS points of sites and specific birds, those are available here <http://goo.gl/jNUd9w> , and can also be requested in e.g. .kml (for Google Earth), .gpx (for GPS devices and GPS software) format. Tracks are also available. Since we visited well known sites and did not arrange logistics ourselves, we only include some notes for each site.

Mabamba

The best place to find Shoebill. From Entebbe it was 1,5-hour drive (0.0756, 32.35013). In two small boats we set out in the papyrus swamp and it did not take long before we found 3 Shoebills! Some more birding in the swamp resulted in Papyrus Gonolek and Greater Swamp Warbler and after being back on land we concluded with some birding in the nearby scrub.

Budongo

Here the real forest birding began. We birded at two different sites in Budongo Forest. First a full day at the Royal Mile and then a night and short morning at the Budongo Eco-Lodge (within Murchinson Falls NP)

Royal Mile (1.70227, 31.54034): We had a fantastic day at the famous Royal Mile. The targets kept coming, we were lucky with the bird activity that day (due to good weather?) but also many credits to the excellent birding skills of Raymond our guide who picked up the very high and subtle notes from far away. Highlights included multiple African Dwarf Kingfishers, Jameson's- and Chestnut Wattle-eyes, the rare Ituri Batis, Rufous-capped Eremomela, Blue-throated Roller, Chestnut-capped Flycatcher, Forest Flycatcher, Shining Blue Kingfisher, Grey Longbill, Green- and Lemon-bellied Crombec, a pair of Wilcock's Honeyguide and finally, after much perseverance we saw a beautiful Chocolate-backed Kingfisher!

Budongo Eco-lodge (1.91816, 31.71936): We arrived in the pouring rain, so we could forget any plans of owling. The next morning our main target was the Puvell's Illadopsis, of which we found several along the entrance road (1.91934, 31.71835).

Murchison Falls N.P.

A large NP with mostly savanna habitat although the first bit is part of the Budongo Forest. We stayed for one night at the Red Chilli Camp (2.27736, 31.5645) near the Nile shore and since we had left Budongo eco lodge early we had almost a full day here and another morning. Unfortunately, the ferry across the Nile had broken so our plans of birding the western shore of the park got cancelled (Dusky Babbler is apparently easier on that side, we missed it). . Instead we birded around the camp area and in the afternoon did a boat ride to the falls. This provided not that many new species but highlights were the very beautiful Rock Pratincole and another Shoebill! In the evening we did a night drive along the road we drove in on; not the hoped for Pennant-winged Nightjar but we did find a calling Buff-spotted Flufftail and a posing Greyish Eagle Owl. In hindsight we could have done better here with more preparation and exact information for a couple of targets.

Kibale

Another good forest site which is best none for its main target here the Green-breasted Pitta. Unfortunately, we missed it. We met our guide Gerard sr. at 6 o'clock at the Kibale HQ (0.43694, 30.39496) and walked for 30 minutes into the still dark forest. We waited until 08:30 but no sound of the pitta. We then searched the surroundings some more but no luck. Gerrard told us that the last time the Pitta was heard was 3 weeks ago. Rest of the morning was spent exploring the trails which became productive when we ran into a huge mix species flock with several new birds (among others Velvet-mantled Drongo and White-headed Wood-hoopoe).

Other birding sites we visited were the small bridge along the entrance road (0.4588, 30.37982) (with the Cassin's trio) and in the afternoon the Bigodi swamp (0.40614, 30.40876).

Buhoma

Many of the Albertine Rift endemics can be found within the Bwindi Impenetrable NP of which Buhoma offers good access (and is lower in altitude than Ruhija). It consists of beautiful primary forest on the border with Congo and is also a popular destination for Gorilla trekking. We birded here a full day, mainly walking the first km of the trail into the forest. This was very productive and highlights included Red-throated Alethe, Blue-headed Sunbird, Neuman's Warbler, Grey-winged Robin-chat, White-bellied Robin-chat, Green-backed Twinspot and the recently described Willard's Sooty Boobou (-1.01365, 29.62113)

The Neck

Good stretch of forest for roadside birding in between Buhoma and Ruhija. The total stretch is about 4km of which we walked half. Activity was rather low during our visit, maybe because it was already late morning? Highlights were a Least Honeyguide and a Cassin's Honeybird that gave good views.

Ruhija

On the other side of Bwindi Impenetrable NP from Buhoma lies Ruhija which is the area to search for the higher altitude Albertine Rift endemics. We birded in 3 main areas: the first part of the school track (-1.04857, 29.77804) (for Regal Sunbird and Grauer's Warbler), the road through the park after the gates (Handsome Francolin, Ruwenzori Batis) and the trail to the swamp (Dwarf Honeyguide, Red-chested Flufftail, Grauer's Swamp Warbler, Archer's Ground Robin). Big miss was the Grauer's Broadbill since there is a reliable site along the trail to the swamp where they breed. There was a nest-like construction in the tree (according to our guide this was made by the broadbills) but it was clearly abandoned. We did try for a good part of the day but saw none.

ANNOTATED SPECIES LIST

We have tried to accurately indicate the proper subspecies for all our observations, usually based on geographic locations based on the IOC World Bird List version 6.2.. IUCN status is stated in red. We tried to keep detailed notes throughout the trip but especially commoner species might not have been written down daily.

+ = several

1+= a minimum of one, probably more

++ = common

+++ = very common

HO = Heard Only

- 1 White-faced Whistling Duck - *Dendrocygna viduata*
30/04: ++, en route;
- 2 Spur-winged Goose - *Plectropterus gambensis gambensis*
30/04: 5+, en route;
- 3 Knob-billed Duck - *Sarkidiornis melanotos*
30/04: 2, en route;
- 4 Egyptian Goose - *Alopochen aegyptiaca*
02/05: 25+, Murchinson;
09/05: +, en route;
- 5 African Pygmy Goose - *Nettapus auritus*
09/05: 1, en route;
- 6 African Black Duck - *Anas sparsa leucostigma*
07/05: 2, Bwindi - The neck;
- 7 Yellow-billed Duck - *Anas undulata ruppelli*
30/04: 10+, Mabamba;
- 8 Helmeted Guineafowl - *Numida meleagris meleagris*
30/04: 3, en route;
02/05: 8+, Murchinson;
05/05: 2, Queen Elisabeth;
- 9 Crested Guineafowl - *Guttera pucherani verreauxi*
01/05: 5, Budongo - Royal mile;
- 10 Coqui Francolin - *Peliperdix coqui coqui*
05/05: HO, Queen Elisabeth;
- 11 Crested Francolin - *Dendroperdix sephaena grantii*
02/05: 3, Murchinson;
03/05: +, Murchinson;

- 12 Heuglin's Francolin - *Pternistis icterorhynchus* - [Restricted Range](#)
02/05: 1, Murchinson;
- 13 Handsome Francolin - *Pternistis nobilis* - [Albertine Rift Endemic](#)
07/05: 3, Bwindi - Ruhija;
08/05: HO, Bwindi - Ruhija;
- 14 Red-necked Spurfowl - *Pternistis afer cranchii*
05/05: 5+, Queen Elisabeth;
09/05: HO, en route;
- 15 Yellow-billed Stork - *Mycteria ibis*
30/04: 1, en route;
02/05: 4, Murchinson;
- 16 African Openbill - *Anastomus lamelligerus lamelligerus*
30/04: +, en route;
04/05: 20+, Kibale;
09/05: 10+, en route;
- 17 Woolly-necked Stork - *Ciconia episcopus microscelis*
30/04: 1, en route;
03/05: 2, Murchinson;
09/05: 1, en route;
- 18 Saddle-billed Stork - *Ephippiorhynchus senegalensis*
09/05: 1, en route;
- 19 Marabou Stork - *Leptoptilos crumenifer*
30/04: ++, en route;
05/05: +, en route;
09/05: ++, en route;
- 20 African Sacred Ibis - *Threskiornis aethiopicus*
30/04: ++, en route;
02/05: 10+, Murchinson;
09/05: +, en route;
- 21 Hadada Ibis - *Bostrychia hagedash nilotica*
30/04: ++, Mabamba;
30/04: +, en route;
04/05: ++, Kibale;
05/05: +, Queen Elisabeth;
09/05: +, en route;
